More than 5 years of experience as a Software Developer. Specialized in React, Astro, Next.js, Symfony, Node.js (Express), Doctrine ORM, ApiPlatform, MariaDB, and MongoDB. I have led teams and developed projects from scratch through to production deployment, working with both national and international clients.

PROFESSIONAL EXPERIENCE

MacMillan Studio

FullStack Developer

Cádiz, Spain

March 2025–Present

- Developed a web platform for financial document management for a law firm, using Astro and Vue components.
- Integrated and managed dynamic content through WordPress as a CMS, ensuring platform performance and usability.

Hiniestic

FullStack Developer

Málaga, Spain

August 2020–March 2025

- Developed full-stack projects from scratch to production, including web and mobile applications.
- Built web applications with Symfony (PHP) and React, utilizing hooks, Redux, Redux-Saga, implementing clean architecture, reusable components, and end-to-end testing (Cypress).
- Designed and developed REST APIs with API Platform, Doctrine ORM, Node.js, and Express, ensuring proper entity modeling, validation, and routing.
- Managed MariaDB and MongoDB databases, including queries, schema design, and maintenance.
- Collaborated with multidisciplinary teams following best practices, version control, and agile methodologies, integrating APIs and native functionalities for cross-platform mobile apps.

EDUCATION
